

Information about our exhibition samples

Beverage cooler

The waterproof cooler demonstrates that waterproof folding carton packaging can be produced without the use of plastic, plastic coatings or films thanks to the intelligent interplay of design, substrate and coatings.

In addition, the intelligent use of effect coatings also enhances the look and feel of functional packaging.

Machine requirements:

Five-colour offset printing machine with at least one coating unit, screen printing machine, die-cutting press, gluing machine

Material:

Outside: MetsäBoard Classic FBB in 340 g/m² | Inside: MetsäBoard Prime FBB EB 265 g/m²

Suitability: Food industry
