Food tin for Ricola

A CO2-reduced can made of bluemint® steel was launched on the market for the Swiss company Ricola in 2022.

The production process involved printing on tinplate, including 3D coating, which creates both a visual and tactile effect. This process was used with UV drying systems from IST.

Manufacturer:

Hoffmann The Tin

Machine:

König & Bauer MetalStar Sprint
5 Colours

Suitability: Food industry
