

Information about our exhibition samples

Labels

IST UV technology is also used for label printing, such as the labels used by Käserebellen for their Bergblumen Rebell.

Here, opaque white was applied in the first unit of the printing press, which was dried with the help of an intermediate dryer. The labels are also die-cut inline in the coating unit.

Manufacturer:

Wiesendanger Medien

Machine:

Heidelberger Speedmaster CX 102-5L UV

Suitability: Food industry
