

Information about our exhibition samples

Lufthansa AG of Safety Card

A product that probably all of us have held in our hands at some point: safety or instruction cards in aeroplanes on the way to a holiday. This Lufthansa AG safety card was also printed using IST-UV technology.

The cards are printed on a Heidelberg Speedmaster CX 102 with 5 colours and UV drive in UV offset. The cards are printed in 4/4 colours (Euroscale) and with a semi-matt UV varnish over the entire surface. Printing is done on polypropylene in white with a thickness of 0.3 mm.

Manufacturer:

Wiesendanger Medien

Machine:

Heidelberger Speedmaster CX 102-5L UV

Material:

Polypropylen weiß 0,3mm
