VDMB I Annual Report 2020

An annual report that is unrivalled: Silver holographic hot foil stamping was used on the two title pages. In the black section, cellophane-wrapped paper was printed with opaque white and black on two sides using mirror foil. This creates a black-metallic effect with silver text. The highlight for the reader is a pop-up swan in the centre of the magazine, which is reflected in the water on two pages with printed mirror foil.

The print was realised with LED UV offset. This allowed opaque white to be used and silver foil to be printed without any problems. Up to six layers of opaque white were used for coloured or black paper.

Manufacturer:

Wiesendanger Medien

Machine:

Heidelberger Speedmaster CX 102-5L UV + SX52-5L UV

Material:

Papers from the Gmund Colour Series + Gmund Transparent
