

Collaboration of IST Metz and ITL

IST and ITL

An ideal couple: IST & ITL

Strategic Alliance of IST METZ GmbH and the British company Integration Technology Ltd. (ITL) from 2011-2015

Takeover of the majority stake in 2015 by IST Metz

Ideal expansion of the portfolio:

UV lamp and LED systems for most applications in the market – from small and compact systems to big UV units

An ideal couple: IST & ITL

ITL was founded in 2000 and is, with a turnover of more than 7 million Euro, global market leader in UV units for InkJet printing.

In the future market of LED UV systems ITL provides two attractive series with the LED Zero Solidcure for the high performance class and the LED Zero Pincure resp. VTwin for the so-called pinning (pre-curing) of InkJet inks.

These are a completion of the well-known IST products for classic UV applications as well as of the IST systems LUV and MBS-LI, which are especially designed for the high-performance field of the UV InkJet printing.

UV is our core competence

Collaboration with

SpecialIST for Digital Printing
